# Year Group Summary

Here is a brief overview of what pupils are learning in Maths in Year 7. All students are expected to achieve the 'Basic' objectives listed below, with many going on to achieve the 'Intermediate' ones and some managing the 'Advanced' ones. Have a look to see where your child is currently performing:

## Maths

---

### Basic

- Understand place value for decimals of any size.
- Basic decimal notation for money and measures.
- Order positive and negative numbers.
- Expressing themselves verbally using the mathematical language.
- Solve equations.
- Move between equivalent fractions and decimals.
- Analyse 2D and 3D shapes.
- Change easily between different measurements.
- Lists, tables, charts and simple data diagrams.

### Intermediate

- Know written, formal forms of multiplication.
- Use four operations and efficient calculation strategies.
- Interpret line graphs and pie charts.
- Use approximations to estimate answers.
- Use simple formulae.
- In algebra, identify variables.
- Reflections.
- Accuracy in measurement.
- Areas of shapes.
- Collection of discrete data.
- Frequency, averages and ranges.

### Advanced

- Four rules of whole numbers, negative numbers and decimals.
- Ratio and proportion.
- Fractions and percentages.
- Simple theorems.
- Use notation, including brackets.
- Coordinates in four quadrants.
- Constructions, angles, symmetries.
- Metric conversions.
- Areas of rectangles.
- Averages and range.
- Interpretation of different graph forms including pie charts.
- Simple probability scales and outcomes.

## Revision Tips

Revision can sometimes feel like hard work, but it doesn't have to be. Here are some top tips on how to get started.

Maths problems are all around us. For example, fractions can be talked about when cutting up cakes or pizzas. Or, to help with addition, ask your children to help you count up how much your weekly food shop will come to. English can be practised by reading newspapers, writing letters and diaries and discussing characters in films or books with your children.

So, use everyday situations to keep your child stimulated in their learning. This will also help them understand the value of their learning.

When it comes to traditional revision techniques, here are some top tips and tricks on how to get the best out of your child ahead of their exams.

***Revision is the perfect opportunity to bond with your child, so the most important thing is that you are both enjoying it and having fun!***

It is always good to find out how your child learns best. This will be tested in schools as children get older. Many people are visual learners, often being able to recall a picture of what they see on a page. If your child is one of these people, decorating and sticking up revision notes in ways that help key points stick in the mind can be really helpful, as can spider diagrams. Auditory learners tend to remember sounds better so remembering key facts by mentally 'pinning' them to a particular tune or piece of music can help. Kinaesthetic learners find that movement can help with remembering things, for example creating jigsaws out of key words and phrases and then recalling the piecing together of the jigsaw during the exam.

A good tip, especially with younger children, is to keep revision fun. This will mean that they are relaxed and enjoying themselves and won't be

affected by the pressure of 'test stress'. There are plenty of online resources and fun activities available for revision purposes that are set out as puzzles and games that younger children will love completing.

All children, no matter what age they are, learn better when they are comfortable. Try and ensure that the room is quiet and calm. Revision is the perfect opportunity for you to bond with your child, so the most important thing is that you are both enjoying it and having fun!

Here are some exclusive worksheets to help you get started:

### Maths

- Division Word Problems
- Simplify and then Solve Equations
- Solve Worded Number Problems
- Square Roots of Decimals
- Translate into Algebra

Year 7

# Maths Worksheets

- Solve Worded Number Problems
- Square Roots of Decimals
- Translate into Algebra

Year 7

## Maths Worksheet

# Division Word Problems

In this worksheet, students must round off to give sensible answers to wordy division problems.

### Key Information

<b>Topic</b>	<b>Division</b>
<b>Questions</b>	<b>10</b>
<b>Key Stage</b>	<b>KS3</b>
<b>Year</b>	<b>7</b>
<b>Curriculum Topic</b>	<b>Number</b>
<b>Curriculum Subtopic</b>	<b>Round Numbers</b>

## Introduction

Sometimes when we divide, we get answers which are too accurate and therefore don't make sense.

We must round the answer up or down to make sense of the question.

### Example

How many coaches carrying 20 people will be needed to take 575 people to a football match?

### Answer

$$575 \div 20 = 28.75$$

It is IMPOSSIBLE to have 28.75 coaches...  
so we need to THINK!

28 coaches will not be enough.

So we need to round up to 29 coaches.

## Questions

Q1

Solve the problem and round to make a sensible answer.

How many chocolate bars at 8p can I buy for £1?

Answer

Q2

Solve the problem and round to make a sensible answer.

How many chocolate bars at 23p can I buy for £1?

Answer

Q3

Solve the problem and round to make a sensible answer.

How many coaches carrying 40 people will be needed to take 430 people to a football match?

Answer

Q4

Solve the problem and round to make a sensible answer.

How many chocolate bars at 13p can I buy for £1?

Answer

Interested in online material?  
For Year 7 interactive resources in Maths, English and Science  
visit [edplace.com/revision](https://www.edplace.com/revision)

## Questions

**Q5**

Solve the problem and round to make a sensible answer.

How many chocolate bars at 12p can I buy for £2?

Answer

**Q6**

Solve the problem and round to make a sensible answer.

How many chocolate bars at 5p can I buy for £3?

Answer

**Q7**

Solve the problem and round to make a sensible answer.

How many coaches carrying 40 people will be needed to take 652 people to a football match?

Answer

**Q8**

Solve the problem and round to make a sensible answer.

How many whole weeks are there in 286 days?

Answer

Interested in online material?

visit [edplace.com/revision](https://www.edplace.com/revision)

## Questions

Q9

Solve the problem and round to make a sensible answer.

How many flower boxes of 17 plants can be filled with 674 plants?

Answer

Q10

Solve the problem and round to make a sensible answer.

A volunteer has to deliver 447 picnic boxes. Her car will only hold 26 boxes. How many journeys must she make to deliver them all?

Answer

Interested in online material?  
For Year 7 interactive resources in Maths, English and Science  
visit [edplace.com/revision](https://www.edplace.com/revision)

## Answers

A1

Correct Answer

12

TICK

**Explanation**

$100 \div 8 = 12.5$ , but we can't buy 0.5 of a bar of chocolate, so the answer is 12 whole bars.

A2

Correct Answer

4

TICK

**Explanation**

$100 \div 23 = 4.34783\dots$  it's impossible to buy 0.34783... of a bar of chocolate, so the answer is 4 whole bars.

A3

Correct Answer

11

TICK

**Explanation**

$430 \div 40 = 10.75$ . This means that we have 10 full coaches, plus one more for the remaining people.

A4

Correct Answer

7

TICK

**Explanation**

$100 \div 13 = 7.692\dots$  so we can only buy 7 WHOLE bars..

A5

Correct Answer

16

TICK

**Explanation**

$200 \div 12 = 16.666\dots$  so we can buy 16 WHOLE bars.

A6

Correct Answer

60

TICK

**Explanation**

$300 \div 5 = 60$ , so we can buy exactly 60 bars.

A7

Correct Answer

17

TICK

**Explanation**

$652 \div 40 = 16.3$ . This means we have 16 full coaches plus one more for the remaining people.

A8

Correct Answer

40

TICK

**Explanation**

$286 \div 7 = 40.8571\dots$  which means there are 40 WHOLE weeks in 286 days.

For Year 7 interactive resources in Maths, English and Science  
visit [edplace.com/revision](https://www.edplace.com/revision)

## Answers

A9

Correct  
Answer

39

TICK

**Explanation**

$674 \div 17 = 39.647\dots$  which means that only 39 boxes can be completely filled.

A10

Correct  
Answer

18

TICK

**Explanation**

$447 \div 26 = 17.1923\dots$  which means that she can make 17 journeys with her car full, but she needs to make one more journey to take the left over boxes.

Year 7

## Maths Worksheet

# Simplify and then Solve Equations

In this worksheet, students must simplify like terms before solving simple one-stage equations.

### Key Information

Topic	Algebra: Variables and Equations
Questions	10
Key Stage	KS3
Year	7
Curriculum Topic	Algebra
Curriculum Subtopic	Understand Expressions, Equations, Inequalities, Terms and Factors

## Introduction

When we solve algebraic equations, our aim is to end up with one letter on one side of the equals sign and one number on the other. This is the solution.

We do this by simplifying like terms if we can and then using inverse operations to undo things that get in the way, but remember that we must do the same thing to both sides.

Example

$$7b - 2b = 20$$

Answer

Simplify the left hand side by combining like terms.

$$5b = 20$$

Divide both sides by 5.

$$5b \div 5 = 20 \div 5$$

Simplify.

$$b = 4$$

## Questions

Q1

Solve for a:  $7a - a = 12$

a = 19

a = 12

a = 2

Q2

Solve for a:  $4a + a = 15$

a = -11

a = 3

a = 19

Q3

Solve for a:  $5a + 2a = 21$

a = 14

a = 3

a = 28

Q4

Solve for a:  $6a + 5a = 22$

a = 33

a = 11

a = 2

Q5

Solve for a:  $5a - 4a = 21$

a = -12

a = 21

a = 12

Q6

Solve for a:  $10a - 2a = 24$

a = 3

a = 6

a = -6

## Questions

Q7

Solve for a:  $a - 2a = 18$

$a = -18$

$a = 6$

$a = 18$

Q8

Solve for a:  $3a - 6a = 18$

$a = 15$

$a = 6$

$a = -6$

Q9

Solve for a:  $2a - a = -13$

$a = 11$

$a = -13$

$a = 12$

Q10

Solve for a:  $-10a + 25a = -30$

$a = 15$

$a = -15$

$a = -2$

Year 7

## Maths Worksheet

# Solve Worded Number Problems

In this worksheet, students must solve worded number problems with or without the aid of a calculator.

### Key Information

<b>Topic</b>	<b>Four Operations</b>
<b>Questions</b>	<b>10</b>
<b>Key Stage</b>	<b>KS3</b>
<b>Year</b>	<b>7</b>
<b>Curriculum Topic</b>	<b>Number</b>
<b>Curriculum Subtopic</b>	<b>Four Operations</b>

## Introduction

In this worksheet, you must answer worded number problems.

### Example

Which fraction is larger?       $A = \frac{3}{9}$  or  $B = \frac{6}{7}$

### Answer

$$3 \div 9 = 0.33333333.....$$

$$6 \div 7 = 0.8571428....., \text{ which is larger?}$$

Answer is B

Interested in online material?  
For Year 7 interactive resources in Maths, English and Science  
visit [edplace.com/revision](https://www.edplace.com/revision)

## Questions

Q1

Which fraction is larger?  
Use your calculator to help you.

$$A = \frac{3}{4} \text{ or } B = \frac{5}{9}$$

Q2

Find two whole numbers whose sum is 8 and whose product is 12.

Q3

Two consecutive whole numbers add up to 41.  
What are the numbers?

Q4

You are told that three consecutive whole numbers add up to 84.  
If this is possible, find the numbers.

visit [edplace.com/revision](https://www.edplace.com/revision)

## Questions

Q5

The sum of two whole numbers is 22 and their difference is 14.  
Find the two numbers.

19 and 6

16 and 6

18 and 4

Q6

You are told that the sum of another two whole numbers is 20 and their difference is 15. Is this possible?

Yes

No

Q7

The mean of three numbers is 12.  
Two of three numbers are 9 and 14.  
What is the third number?

14

13

17

Q8

Which fraction is larger?  
Use your calculator to help you.

$$A = \frac{3}{9} \text{ or } B = \frac{6}{7}$$

A

B

## Answers

A1

Correct Answer

A

TICK

**Explanation**

$$3 \div 4 = 0.75$$

$$5 \div 9 = 0.555$$

So A is larger

A5

Correct Answer

18 and 4

TICK

**Explanation**

$$18 + 4 = 22$$

$$18 - 4 = 14$$

A2

Answer 1

2

TICK

Answer 2

6

TICK

**Explanation**

$$2 + 6 = 8$$

$$2 \times 6 = 12$$

A6

Correct Answer

No

TICK

**Explanation**

The only solution is  $17\frac{1}{2}$  and  $2\frac{1}{2}$ , which are not whole numbers

A3

Correct Answer

20 and  
21

TICK

**Explanation**

$$20 + 21 = 41$$

A7

Correct Answer

13

TICK

**Explanation**

$$\text{Total is } 3 \times 12 = 36$$

A4

Correct Answer

27 and 28  
and 29

TICK

**Explanation**

$$27 + 28 + 29 = 84$$

A8

Correct Answer

B

TICK

**Explanation**

$$3 \div 9 = 0.333$$

$$6 \div 7 = 0.857$$

So B is larger

## Answers

**A9**

Answer 1

1

TICK

Answer 2

8

TICK

**Explanation**

$$1 + 8 = 9$$

$$1 \times 8 = 8$$

**A10**

Correct  
Answer

A

TICK

**Explanation**

$$1 \div 6 = 0.166$$

$$2 \div 9 = 0.222$$

So A is smaller

Year 7

## Maths Worksheet

# Square Roots of Decimals

In this worksheet, students must state the square roots of decimal numbers.

### Key Information

<b>Topic</b>	<b>Numbers: Integer Powers and Real Roots</b>
<b>Questions</b>	<b>10</b>
<b>Key Stage</b>	<b>KS3</b>
<b>Year</b>	<b>7</b>
<b>Curriculum Topic</b>	<b>Number</b>
<b>Curriculum Subtopic</b>	<b>Integer Powers and Real Roots</b>

## Introduction

The words **squared** and **square Root** are opposites.  
You should know that 0.3 **squared** = 0.09 because  
 $0.3 \times 0.3 = 0.09$ .

We write this as  $0.3^2 = 0.09$ .

And so the square root of  $0.09 = 0.3$ .

We write this as  $\sqrt{0.09} = 0.3$ .

### Example

Work out  $\sqrt{0.49}$  and  $\sqrt{0.0001}$ .

### Answer

$\sqrt{0.49} = 0.7$  because  $0.7^2 = 0.49$ .

$\sqrt{0.0001} = 0.01$  because  $0.01^2 = 0.01 \times 0.01 = 0.0001$ .

Interested in online material?  
For Year 7 interactive resources in Maths, English and Science  
visit [edplace.com/revision](https://www.edplace.com/revision)

## Questions

Q1

Work out:  $\sqrt{0.25}$

Answer

Q2

Work out:  $\sqrt{0.09}$

Answer

Q3

Work out:  $\sqrt{0.49}$

Answer

Q4

Work out:  $\sqrt{0.81}$

Answer

Q5

Work out:  $\sqrt{0.01}$

Answer

visit [edplace.com/revision](https://www.edplace.com/revision)

## Questions

Q6

Work out:  $\sqrt{0.16}$

Answer

Q7

Work out:  $\sqrt{0.36}$

Answer

Q8

Work out:  $\sqrt{0.64}$

Answer

Q9

Work out:  $\sqrt{0.0004}$

Answer

Q10

Work out:  $\sqrt{0.0009}$

Answer

Interested in online material?  
For Year 7 interactive resources in Maths, English and Science  
visit [edplace.com/revision](https://www.edplace.com/revision)

## Answers

A1

0.5

TICK

**Explanation**

$\sqrt{0.25} = 0.5$  because  $0.5^2$  or  
 $0.5 \times 0.5 = 0.25$

A5

0.1

TICK

**Explanation**

$\sqrt{0.01} = 0.1$  because  $0.1^2$  or  
 $0.1 \times 0.1 = 0.01$

A2

0.3

TICK

**Explanation**

$\sqrt{0.09} = 0.3$  because  $0.3^2$  or  
 $0.3 \times 0.3 = 0.09$

A6

0.4

TICK

**Explanation**

$\sqrt{0.16} = 0.4$  because  $0.4^2$  or  
 $0.4 \times 0.4 = 0.16$

A3

0.7

TICK

**Explanation**

$\sqrt{0.49} = 0.7$  because  $0.7^2$  or  
 $0.7 \times 0.7 = 0.49$

A7

0.6

TICK

**Explanation**

$\sqrt{0.36} = 0.6$  because  $0.6^2$  or  
 $0.6 \times 0.6 = 0.36$

A4

0.9

TICK

**Explanation**

$\sqrt{0.81} = 0.9$  because  $0.9^2$  or  
 $0.9 \times 0.9 = 0.81$

A8

0.8

TICK

**Explanation**

$\sqrt{0.64} = 0.8$  because  $0.8^2$  or  
 $0.8 \times 0.8 = 0.64$

Year 7

## Maths Worksheet

# Translate into Algebra

In this worksheet, students must choose the expression which matches the given word problem.

### Key Information

<b>Topic</b>	<b>Algebra: Problem Solving</b>
<b>Questions</b>	<b>10</b>
<b>Key Stage</b>	<b>KS3</b>
<b>Year</b>	<b>7</b>
<b>Curriculum Topic</b>	<b>Reason Mathematically</b>
<b>Curriculum Subtopic</b>	<b>Extend Understanding, Connections and Relationships</b>

## Introduction

Look at the following examples to see how algebraic expressions can be used to represent word problems.

Expression	Word Problem
$a + 4$	4 more than $a$
$a - 4$	4 less than $a$
$4 - a$	$a$ less than 4
$4a$	4 times $a$
$a/4$	$a \div 4$ or $\frac{1}{4}$ of $a$
$3a + 4$	4 more than 3 times $a$
$a/2 - 6$	6 less than half of $a$

## Questions

Q1

Jack has  $m$  marbles and his sister gives him 4 more.  
Choose the expression which shows how many he has now.

$m$

$4m$

$m + 4$

$m - 4$

Q2

Bill has  $d$  songs on his music player.  
He deletes 15 of them. How many does he have now?

$d$

$d - 15$

$15 - d$

$d + 15$

Q3

Katie has  $s$  sweets. She gives half of them to her brother.  
How many does she have left?

$s - 2$

$2s$

$s - \frac{1}{2}$

$s/2$

Q4

Jill has  $m$  marbles and her sister gives her 14 more.  
Choose the expression which shows how many she has now.

$14m$

$m - 14$

$14 - m$

$m + 14$

## Questions

Q5

Jill has  $m$  marbles and gives her sister 14 of them.  
Choose the expression which shows how many she has now.

$m$

$14m$

$m + 14$

$m - 14$

Q6

Bill has  $d$  songs on his music player.  
He buys 15 more songs. How many does he have now?

$d$

$15d$

$d + 15$

$d - 15$

Q7

Dan has 15 songs on his music player.  
He deletes  $d$  of them. How many does he have now?

$d$

$d - 15$

$15 - d$

$d + 15$

Q8

Dan has  $d$  songs on his music player. Anne has fifteen times as many.  
How many does Anne have?

$15d$

$d - 15$

$15 - d$

$d + 15$

## Answers

A1

$$m + 4$$

TICK

**Explanation**  
m marbles + 4 from his sister

A2

$$d - 15$$

TICK

**Explanation**  
d songs - 15 deleted songs

A3

$$s/2$$

TICK

A4

$$m + 14$$

TICK

**Explanation**  
m marbles + 14 her sister gave her

A5

$$m - 14$$

TICK

**Explanation**  
m marbles - 14 Jill gave to her sister

A6

$$d + 15$$

TICK

**Explanation**  
d songs + 15 new songs

A7

$$15 - d$$

TICK

**Explanation**  
15 songs - d deleted songs

A8

$$15d$$

TICK

**Explanation**  
15d is the same as 15 x d songs that Dan has

A9

$$b - 5$$

TICK

**Explanation**  
b books - 5 books Tariq lent to his sister

A10

$$25 - b$$

TICK

**Explanation**  
25 books - b books Tariq lent to his sister
